Jul 18 – Oct 19

Senior Frontend Developer @ HUMANITEC

humanitec.com

- Promoted to a senior role after 2 months of working on an Angular project for an external client.
- Successfully delivered an MVP in 3 months, vastly improving loading times, UX, and testing.
- Joined a new team to develop the company's core product in React.js alongside the company's most senior developers.
- Mentored junior developers through code reviews, pair programming, and feedback sessions.
- Pushed for knowledge sharing by organizing guild meetings, creating workshop exercises, and preparing presentations after attending conferences.

TypeScript React.js Hooks Jest styled-components Angular NgRx Jasmine SASS

Jul 16 – Jun 18

Frontend Developer @ TALQUE

talque.com

- Built screens for a hybrid mobile app using Angular and Ionic.
- Migrated project files from CoffeeScript to TypeScript.

TypeScript Angular Jasmine SASS Ionic

SIDE PROJECTS

Jan 19 – Jun 22

Contributor & Advisor @ BUILDLY

github.com/buildlyio

- Created open-source templates, including authentication modules, to help startups quickly set up projects in React and Angular.
- Developed custom UI libraries in both React and Angular.
- Worked as freelancer for 2 customers using the React templates, assisting in onboarding their teams.
- Advised various clients on file structure and UX improvements.
